

## Installing and Capturing Data Using Etherpeek

### **Etherpeek Installation**

- 1) Extract the zip file to a directory.
- 2) Run setup.exe
- 3) Select "Install Etherpeek" from the list of options.
- 4) Follow the instructions.
- 5) Reboot your computer when the installation is done.

### **Capturing Data**

- 1) Run Etherpeek by selecting "Start->Programs->AG Group Etherpeek"
- 2) Select your Ethernet Adapter when asked. Press OK.
- 3) Start a new capture session using "File->New"
- 4) Start a new capture by selecting "Start Capture" (Top right of capture Window)
- 5) Start the Ethernet communications with the FieldServer.
- 6) Make sure you can see traffic in the capture window.
- 7) Repeat the experiment a few times.
- 8) Stop the capture by pressing "Stop Capture"
- 9) Save the data using "File->Save\_All\_Packets"
- 10) Send the resulting file to FieldServer Technologies. It will have a \*.pkt extension.
