ENOTE 0092

Downloading config and firmware to X300 using USB

Ver	5.22
Rev	1

TABLE OF CONTENTS

1	Introduction	2
2	Procedure	2
2.1	Load any of the following files onto the root directory of the USB	2
2.2	Download files to the FieldServer	2

1 INTRODUCTION

The eNote describes how to download a config file and firmware to a FS-B3510-05, FS-B3512-05, FS-B3514-05, FS-B3515-05, FS-B3520-05, or FS-B3521-05 using USB.

2 PROCEDURE

2.1 Load any of the following files onto the root directory of the USB

- Config.csv (configuration file)
- Nlx300.bin (firmware file)

2.2 Download files to the FieldServer

- Power down the FieldServer
- Insert the USB into port USB1
- Power up the FieldServer
- When the RUN LED begins flashing, the files will have been uploaded onto the FieldServer
