**For Immediate Release**

## **FieldServer Technologies SlotServer for ControlLogix Interface to Building Automation Systems**

**Easily link building automation protocols to plant process controls**

*January 12, 2009* – FieldServer Technologies' SlotServer interfaces Building Automation and Fire Alarm data to process control systems. SlotServer plugs into Allen Bradley ControlLogix PLC, delivering data from BACnet, LonWorks, Metasys and more to process systems.

Limited manpower, cost-efficient operation, or a need to document ambient conditions requires BAS information link to process control. FieldServer is the only gateway that can deliver such interoperability.

### **About FieldServer Technologies**

FieldServer Technologies, a wholly owned division of Sierra Monitor Corporation based in California, designs and markets a broad line of devices that enhance communication between various instruments, systems, machines and other devices that utilize non-compatible data protocols. FieldServers combine with an extensive driver library to create the perfect interoperability package. For more information about FieldServer Technologies, please visit its Web site at [www.fieldserver.com](http://www.fieldserver.com).
