FieldServer Technologies at AHR 2011

November 24, 2010 – FieldServer Technologies, the major gateway manufacturer in the building industry, is demonstrating its full range of products at the AHR Expo 2011 in Las Vegas, Nevada in Booth N4648.

Featured this year is the new QuickServer, a cost effective, fully configurable, powerful gateway that incorporates the power of FieldServer backed by the proven FieldServer Technical Support Team.. QuickServer can utilize any serial and/or Ethernet protocol found in the extensive FieldServer driver library.

Also featured this year is the upgraded FS-B35 Series FieldServer, the interoperability solution for building automation system integrators that brings together the proven, powerful FieldServer driver library with the latest in gateway design. Upgrades include a new processing system, multiple ports and features that range from COV

About FieldServer Technologies

FieldServer Technologies, a wholly owned division of Sierra Monitor Corporation based in California, designs and markets a broad line of devices that enhance communication between various instruments, systems, machines and other devices that utilize non-compatible data protocols. The FieldServer combined with the extensive driver library makes the perfect package to achieve interoperability. For more information about FieldServer Technologies, please visit its Web site at <http://www.fieldserver.com>
