# FieldServer Technologies introduces QuickServer at AHR 2011

*January 31, 2011* – FieldServer Technologies, the major gateway manufacturer in the building industry, introduced their new QuickServer gateway at the AHR Expo 2011 in Las Vegas, Nevada in Booth N4648.

The new QuickServer is a cost effective, fully configurable, powerful gateway that incorporates the power of FieldServer and is backed by the proven FieldServer Technical Support Team. QuickServer is delivered standard with two protocol drivers, including BACnet/IP, BACnet MS/TP, LonWorks, JCI Metasys N2, Modbus TCP, Modbus RTU or SNMP. The low-cost QuickServer makes it easy to interface the most common Building Automation products and it is BTL Marked.

Also featured this year is the upgraded FS-B35 Series FieldServer, the interoperability solution for building automation system integrators that brings together the proven, powerful FieldServer driver library with the latest in gateway design. Upgrades include a new fast processing system, multiple ports, COV and more.

## About FieldServer Technologies

FieldServer Technologies, a wholly owned division of Sierra Monitor Corporation based in California, designs and markets a broad line of devices that enhance communication between various instruments, systems, machines and other devices that utilize non-compatible data protocols. The FieldServer combined with the extensive driver library makes the perfect package to achieve interoperability.
