For Immediate Release

New OPC Server Gateway from FieldServer Technologies

Easy interoperability for Building Automation Systems to OPC

March 31, 2009 – FieldServer Technologies, the major gateway manufacturer in the building automation and process control industries, is proud to introduce the FS-B-OPC OPC Server Gateway that links legacy building automation devices and networks to OPC.

This server/gateway utilizes the extensive FieldServer driver library combined with the proven FieldServer OPC Server software in one complete standalone package. This server is OPC Foundation compliant with Data Access Server Version 2.0. The base system has a 1,000 point capacity upgradeable to 10,000 points. The server is complete with all the software needed to link your device to OPC.

About FieldServer Technologies

FieldServer Technologies, a wholly owned division of Sierra Monitor Corporation based in California, designs and markets a broad line of devices that enhance communication between various instruments, systems, machines and other devices that utilize non-compatible data protocols. The FieldServer combined with the extensive driver library makes the perfect package to achieve interoperability. For more information about FieldServer Technologies, please visit its Web site at <http://www.fieldserver.com>
