Protocol Driver from FieldServer Technologies for Russelectric

Easily interface Russelectric Model 2000 to building automation and process control networks

July 1, 2008 – FieldServer Technologies, the major gateway manufacturer in the building automation and process control industries, introduces the Russelectric Model 2000 driver that enables Russelectric devices to communicate easily with building automation and process control networks such as BACnet, Modbus, LonWorks, EtherNet/IP, DH+, Modbus TCP, ControlNet and more. This driver greatly enhances the control system integration by inclusion of the data from the Russelectric devices.

About FieldServer Technologies

FieldServer Technologies, a wholly owned division of Sierra Monitor Corporation based in California, designs and markets a broad line of devices that enhance communication between various instruments, systems, machines and other devices that utilize non-compatible data protocols. The FieldServer combined with the extensive driver library makes the perfect package to achieve interoperability. For more information about FieldServer Technologies, please visit its Web site at <http://www.fieldserver.com>
