Protocol Driver from FieldServer Technologies for Stulz Air Technology Systems

**Easily interface Stulz devices to building automation and process
control networks**

September 1, 2008 – FieldServer Technologies, the major gateway manufacturer in the building automation and process control industries, introduces the new Stulz C6000 controller driver that enables the Stulz A/C and chillers to easily interface to Building Automation Systems utilizing various open protocols such as BACnet, LonWorks, JCI Metasys N2 or more. In addition, the Stulz devices can also communicate with process control networks such as EtherNet/IP, DH+, Modbus TCP, ControlNet and other common process protocols.

About FieldServer Technologies

FieldServer Technologies, a wholly owned division of Sierra Monitor Corporation based in California, designs and markets a broad line of devices that enhance communication between various instruments, systems, machines and other devices that utilize non-compatible data protocols. The FieldServer combined with the extensive driver library makes the perfect package to achieve interoperability. For more information about FieldServer Technologies, please visit its Web site at <http://www.fieldserver.com>
