A Sierra Monitor Company

## For Immediate Release

# FieldServer Technologies Industrial Gateways at ISA 2003

*July 10, 2003* – FieldServer Technologies is introducing several new products in Booth 1611 at the ISA2003 Expo in Houston, TX. FieldServer Technologies, a Sierra Monitor company, is a leading manufacturer of gateways to enable device interoperability in the process control and building automation applications.

The new Model FS-B2010 Bridge is an easy to use protocol translator gateway linking a serial device to an Ethernet system. With the largest library of drivers available in the process control market, FieldServer Technologies can meet the user's needs for interoperability. Besides the common process control protocols such as ControlNet, DH+, Modbus, DF1 and Profibus, FieldServer Technologies can also provide interface from building automation or security systems to process control systems. This valuable interface will enable the user to link all the automation systems to a common interface.

### **About FieldServer Technologies**

FieldServer Technologies, a wholly owned division of Sierra Monitor Corporation based in California, designs and markets a broad line of devices that enhance communication between various instruments, systems, machines and other devices that utilize non-compatible data protocols. The FieldServer combined with the extensive driver library makes the perfect package to achieve interoperability. Drives included in this library are Modbus, LonWorks, BACnet, Metasys, DH+, Profibus, plus drivers for fire alarm panels, controllers, and many other devices. For more information about FieldServer Technologies, please visit its Web site at <http://www.fieldserver.com>.
