LonMark Certified OEM Gateways from ProtoCessor

August 30, 2011 – ProtoCessor OEM Gateways from FieldServer Technologies have won LonMark Certification as gateways with changeable Network Variable types. The LonMark Certified products include the ProtoCessor FPC-F04 Embedded Gateway Module, the ProtoCarrier/ProtoCessor FPC-CD2 OEM Gateway and the ProtoNode LER external LonWorks Gateway. ProtoCessor is the OEM brand from FieldServer, a member of LonMark International who has been providing integrators and end-users with LonWorks gateways for over 10 years.

The design of the ProtoCessor LonWorks OEM Gateway from FieldServer Technologies provides the manufacturer the unique capability to interface 1000+ network variables with a single configurable gateway versus only 50 – 250 found in similar products. Thus, the ProtoCessor LonWorks OEM Gateway provides unsurpassed, cost-effective integration power. For more information about the ProtoCessor LonWorks OEM Solution from FieldServer Technologies, visit the website at www.ProtoCessor.com.

LonMark International developed the rigorous LonMark Certification Program to provide confidence to end-users and integrators that products from multiple manufacturers work together. Gateways are key to enabling a manufacturer's device to interface with other building automation systems.

About FieldServer Technologies and ProtoCessor

FieldServer Technologies, a wholly owned division of Sierra Monitor Corporation (OTC BB: SRMC.OB) based in California, designs and markets a broad line of devices that enhance communication between various instruments, systems, machines and other devices that utilize non-compatible data protocols. The FieldServer combined with the extensive driver library makes the perfect package to achieve interoperability. ProtoCessor, as part of FieldServer Technologies, produces OEM gateway solutions used by manufacturers to enable their devices to easily interface with other systems. Drivers included in this library are Modbus, LonWorks, BACnet, Metasys, Allen Bradley EtherNet/IP, plus drivers for many other proprietary and legacy devices.
