

## For Immediate Release

# FieldServer Technologies at AHR 2006

*November 10, 2005* – FieldServer Technologies is introducing several new products in at the AHR Expo 2006 in Chicago, IL at booth 3927. FieldServer Technologies, a Sierra Monitor company, is the leading manufacturer of gateways to enable device interoperability in building automation applications.

The new FS-B35 Series FieldServer, the interoperability solution for building automation system integrators, brings together the proven, powerful FieldServer driver library with the latest in gateway design. This unique, powerful FieldServer packs features demanded by our customers into a compact user friendly package:

- ◆ **Plenty of connectivity** -- four serial ports (2 RS-232 and 2 RS-485), two 10/100BaseT Ethernet ports plus a LonWorks port.
- ◆ **Access to largest driver library in the industry**
- ◆ **Dual Ethernet ports**
- ◆ **1000 point capacity**
- ◆ **Hot Standby capability** -- for redundancy requirements
- ◆ **DIN rail mounting option**

The new SlotServer provides the ability to interface LonWorks and BACnet directly to an Allen Bradley ControlLogix PLC, enabling communication between building automation systems and process control in industrial plants.

### About FieldServer Technologies

FieldServer Technologies, a wholly owned division of Sierra Monitor Corporation based in California, designs and markets a broad line of devices that enhance communication between various instruments, systems, machines and other devices that utilize non-compatible data protocols. The FieldServer combined with the extensive driver library makes the perfect

package to achieve interoperability. For more information about FieldServer Technologies, please visit its Web site at <http://www.fieldserver.com>
